PROFESSIONAL PROFILE

Thoughtful and passionate front-end development professional with a strong background in React and React Native. Passionate about solving real world problems while building beautiful, clean and efficient user interfaces. Seeking opportunities to contribute to an innovative team of highly-skilled, motivated, and interactive engineers and designers.

EXPERIENCE

SOFTWARE ENGINEER

Dovenmuehle Mortgage Inc. / San Francisco, CA / Oct 2018 – Present

Member of small agile development team working to create modern web technology for a large financial services company.

- Built single-page applications using modern web technologies such as ReactJS, Redux, Redux Saga, MySQL, and NodeJS.
- Coordinated an overhaul of company wide design language, helping to vastly improve outdated user interfaces.
- Utilized agile development methodologies and participated in team-led solutions, reviewing peer's code for quality and completeness
- Spearheaded the initial redesign of flagship mobile portfolio management application using React Native, Redux, and Firebase
- Oversaw the creation and maintenance of shared styled cross platform React components.

FULL STACK ENGINEER - CONTRACT

Tunelark / San Francisco, CA / July 2018 – Sept 2018

Worked on a team of six developing new features for an educational web application designed to improve the learning process for middle and high school music students

- Launched an entirely new class management dashboard, built from the ground up using Ruby on Rails with a React/Redux frontend.
- Produced stunning and performant web components using Sass, matching mock-ups created by the team's UI designer.
- Delivered responsive, cross-browser and mobile compatible views, achieving a 10% faster loading time on initial load

OPERATIONS MANAGER

Cirrus Systems, Inc. / Emeryville, CA / Mar 2016 – Aug 2017

Supervised the operations department for an early stage proprietary outdoor LED sign manufacturing startup.

- Started as the sole employee on the operations team and helped grow the department to four employees, including an east coast presence.
- Researched industry SMT and PCB manufacturing standards and implemented in-house domestic production.
- Managed and updated Wordpress e-commerce platform
